

IMET M550 THOR 'B3'

The THOR B3 transmitter has been designed for use with a vast range of complex and high integrity machines, such as 4-5 booms concrete pumps, full accessory equipped gantry cranes, 6 functions hydraulic cranes, special tower cranes, drilling and tunnelling machines. In addition to the 3 double-axis joysticks, the extra wide THOR console has capacity for several on/off and proportional commands making it easy to customise for complex AC and DC powered applications.
