

IMET M550 M8 Transmitter

The M8 transmitter is designed for mounting on a DIN rail, and is the ideal solution for applications requiring wireless transmission for on/off and/or proportional commands coming from sensors or RS232 and RS485 ports. The DIN rail mounted transmitter should be placed inside a control box for clean and trouble free installation, and is supplied c/w external antennae for radio communication. In addition to the 21 on/off and 4 proportional commands, Start, Stop & frequency change input are available as for traditional radio control commands.

Dimensions
180 x 120 x 73 mm
